

PART 1 — HTML Tasks

5 Basic Tasks

1. Create a simple HTML page with:
 - one heading
 - one paragraph
 - one button
2. Add an image to the page.
3. Create a link that opens Google.
4. Use a `div` to group content.
5. Add a simple list (unordered list with 3 items).

5 Intermediate Tasks

1. Create a page with:
 - header section
 - main section
 - footer section
2. Build a simple profile layout with:
 - image
 - name
 - role
 - button
3. Create a table with:
 - Name
 - Course
 - Status
4. Create a form with:
 - name input
 - email input
 - submit button
5. Use semantic tags:
 - header
 - section
 - footer

Advanced Tasks

1. Create a complete “Intern Profile Card” layout using only HTML.
2. Build a page with 3 profile cards (no styling yet).
3. Create a form with:
 - text input
 - email input
 - dropdown
 - checkbox
4. Add labels properly linked to inputs.
5. Structure the page cleanly using nested `divs` and sections.

PART 2 — CSS Tasks

5 Basic Tasks

1. Change background color of the page.
2. Change text color of headings.
3. Add padding to a `div`.
4. Add border to a card.
5. Change font size of paragraph.

5 Intermediate Tasks

1. Center content horizontally.
2. Add hover effect to button.
3. Style profile card:
 - padding
 - border radius
 - shadow
4. Set width and margin for a container.
5. Style table with borders and spacing.

5 Advanced Tasks

1. Create a responsive card layout using only CSS (flexbox).
2. Align 3 cards in a row.
3. Add hover effect to cards (scale or shadow).
4. Create reusable class for buttons.
5. Create a layout with:
 - header fixed at top
 - content in center
 - footer at bottom

PART 3 — Bootstrap Tasks

5 Basic Tasks

1. Add Bootstrap CDN to your project.
2. Use `container` class to wrap content.
3. Create a button using Bootstrap classes.
4. Add margin and padding using Bootstrap utilities.
5. Create a simple card using Bootstrap.

5 Intermediate Tasks

1. Create a 3-column layout using Bootstrap grid.

2. Build a profile card using Bootstrap classes.
3. Add a navbar using Bootstrap.
4. Create a form using Bootstrap styling.
5. Add responsive behavior using `col-md`, `col-lg`.

5 Advanced Tasks

1. Build a responsive card layout (3 cards in desktop, 1 in mobile).
2. Create a dashboard layout using Bootstrap grid.
3. Use Bootstrap utilities to:
 - align items
 - center content
 - space elements
4. Build a pricing section with 3 plans.
5. Combine Bootstrap + custom CSS to improve design.

PART 4 — SCSS Tasks

5 Basic Tasks

1. Create a SCSS file and compile it to CSS.
2. Define a variable for primary color and use it.
3. Define a variable for padding and reuse it.
4. Convert one CSS file into SCSS format.
5. Use SCSS to style a button.

5 Intermediate Tasks

1. Use nesting to style a card component.
2. Create variables for:
 - colors
 - font sizes
3. Apply SCSS nesting for:
 - card
 - heading
 - button
4. Create a reusable mixin for:
 - flex center alignment
5. Use mixin in at least 2 components.

5 Advanced Tasks

1. Create a theme using SCSS variables (light colors).
2. Create a reusable button mixin with:
 - background
 - padding
 - border radius

3. Build a profile card using SCSS with:
 - nested styles
 - variables
4. Create separate SCSS partials:
 - `_variables.scss`
 - `_buttons.scss`
 - `_card.scss`
5. Combine all SCSS files into one main SCSS file.

FINAL COMBINED CHALLENGE (Last 5–10 min)

Task: Build Intern Profile Page

Requirements:

1. Create a page with:
 - header
 - profile section
 - footer
2. Add 3 intern profile cards.
3. Use:
 - HTML for structure
 - Bootstrap for layout
 - CSS for custom styling
 - SCSS for variables and nesting
4. Each card should contain:
 - image
 - name
 - role
 - button
5. Make it:
 - visually clean
 - centered
 - slightly responsive
