

# Props, Lists, Conditional Rendering, Forms

## Topic Focus

- props
- rendering lists
- conditional rendering
- form basics
- state handling

## 5 Basic Tasks

1. Create a component `UserCard` that accepts:
  - name
  - role
2. Render 3 user cards using props.
3. Create an array of courses and display them using `map()`.
4. Show a “No interns available” message if array is empty.
5. Add a button to show/hide a section on the page.

## 5 Intermediate Tasks

1. Build a registration form with fields:
  - name
  - email
  - course
2. Store form values using state.
3. On submit, print entered data below the form.
4. Disable submit button when required fields are empty.
5. Show a success message after form submission.

## 5 Advanced Tasks

1. Build an intern registration page with:
  - name
  - email
  - phone
  - department
  - skills
2. Show submitted data in a styled preview card.
3. Add validation messages for empty inputs.
4. Add a reset button to clear the form.
5. Convert repeated input structures into reusable form field components.

# Dynamic Routing, API Routes, Data Fetching

## Topic Focus

- dynamic routes
- route params
- API routes
- fetching data
- using mock data properly

## 5 Basic Tasks

1. Create a `students` page and show a list of students.
2. Create a dynamic route `/students/[id]`.
3. Clicking on one student should open their detail page.
4. Show student name and ID on detail page.
5. Add a back button to return to list.

## 5 Intermediate Tasks

1. Create an API route that returns a list of interns in JSON.
2. Fetch that data and display it in a page.
3. Create another API route for courses.
4. Fetch course data and show it in cards.
5. Handle loading state while data is being displayed.

## 5 Advanced Tasks

1. Create a dynamic route for `/courses/[id]`.
2. Fetch course details based on selected course ID.
3. Show error message if course is not found.
4. Add filtering UI for course level:
  - Beginner
  - Intermediate
  - Advanced
5. Build a page that fetches tasks from API and groups them by status.
